DETAILED ACTION

Specification

- 1. The disclosure is objected to under 37 CFR §§ 1.71 and 1.74, as being so incomplete and not in accordance with US patent prosecution practice as to preclude a reasonable review of the application and search of the prior art by the examiner. For example, the non-exhaustive list of following items are noted:
- a. In the Brief Description of the Drawings, Figure 1 is stated as being "a diagram sic: side view?] showing how regrowth proceeds on a pattern according to the prior art."

 However, only three of the seven depicted regions are labeled, and it is unclear what all of the various regions are intended to represent.
- b. No drawings of any of the embodiments of the present invention are provided. This renders it unclear, for example, as to whether claims 1 and 2 are directed towards different embodiments or alternatively whether these two claims of differing scope are directed towards the same embodiment. Thus, upon examination on the merits, the drawings will likely be objected to under 37 CFR 1.83(a) since the drawings must show every feature of the invention specified in the claims. Applicant is reminded that no new matter should be entered.
- c. Upon the inclusion of drawings, the specification will also have to be amended to include all of the associated reference numerals.

2. Accordingly, Applicant is required to submit a substitute specification excluding

claims pursuant to 37 CFR 1.125(a) which clarifies the disclosure so that the examiner may make

a proper comparison of the invention with the prior art.

A substitute specification filed under 37 CFR 1.125(a) must only contain subject matter

from the original specification and any previously entered amendment under 37 CFR 1.121. If the

substitute specification contains additional subject matter not of record, the substitute

specification must be filed under 37 CFR 1.125(b) and must be accompanied by: 1) a statement

that the substitute specification contains no new matter; and 2) a marked-up copy showing the

amendments to be made via the substitute specification relative to the specification at the time the

substitute specification is filed.

A shortened statutory period for reply to this action is set to expire thirty days or ONE

MONTH, whichever is longer, from the mailing date of this letter.
